# About Us

Established in 2018, Noor Al Masafi (NAM) has grown into a trusted provider of high-quality business solutions across multiple sectors. Our commitment to excellence, innovation, and client satisfaction has positioned us as a reliable partner for organizations seeking tailored services that drive results.

At NAM, we specialize in delivering comprehensive digital and offset printing solutions that support the branding, marketing, and operational needs of businesses of all sizes. From business cards, brochures, and flyers to large-format banners, custom packaging, and corporate stationery — we offer end-to-end services designed to make your brand stand out.

Backed by advanced printing technology and a team of skilled professionals, we ensure every project meets the highest standards of quality, precision, and timely delivery. Whether it's a small batch of bespoke prints or a high-volume offset job, our services are tailored to meet each client's unique requirements.

Our client-first approach fosters seamless collaboration — enabling us to understand your vision and transform it into compelling print materials that leave a lasting impact. We take pride in blending creativity with efficiency to support your brand's visual identity and communication strategy.

At NAM, we don't just print — we bring your ideas to life.

# BRANDING SERVICES

In order to effectively establish and promote a brand,  
We are offering a variety of branding options.

Choosing the right branding for your product will produce the best visibility on your logo.

# Promotional USB Flash Drives

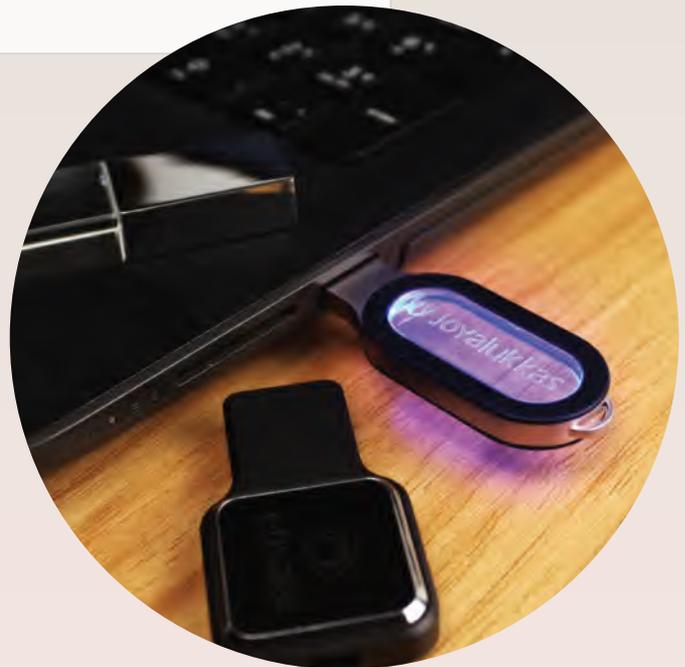

We specialize in importing quality USB Flash Drives for promotional purposes. Our USB Flash Drives are sourced from reputable factories using quality components. We pride ourselves on high standard levels and after sales services.

## Benefits of Using USB Flash Drives

- Portability: USB flash drives are small and lightweight, making them easy to carry around wherever you go.
- Compatibility: USB flash drives are compatible with a wide range of devices, including computers, laptops, and smartphones.
- Ease of Use: Transferring files to and from a USB flash drive is quick and simple, even for beginners.
- Security: USB flash drives can be encrypted to protect sensitive data from unauthorized access.

## Reasons why you choose us as your USB Flash Drive source.

- We import original chips separately and after testing & quality checking, We fix them in USB shells.
- We never import duplicate or upgrade chips and we offer warranty against defect.
- Fast delivery from ready stock.
- Big variety and range of products to select.
- Competitive prices with higher quality.
- Mock Ups and E-Samples

**We never use upgrade chips  
We use only original chips!**

-  Laser Engraving

**Wireless Charging has been around since 1820!**

In 1820, using an electric current and a magnetic compass, Danish physicist Hans Christian Oersted originally discovered that electric currents can create a magnetic field. But the history of wireless charging doesn't stop there! A decade later, Michael Faraday, an English scientist discovered electromagnetic inductive wireless charging!

# Printing technologies

Choosing the best gift - from our wide product collection - for your promotional needs is only half of the success equation. The appearance of your logo or message carries equal importance. In order to ensure the realisation of your brand image, we provide various printing technologies, ranging from traditional methods to state of the art digital technologies. The following guide aims to give you a brief overview of our labelling techniques and to help you pick the best for your selected item.

**SCREEN PRINTING**

Screen printing is a traditional ink-based labelling process, for flat or flattenable products, with high durability and colour accuracy. During the screen printing process ink is directly pressed on the product's surface through a gauze, then fixed with heat treatment.

**UV DTF PRINTING**

UV DTF (Direct-to-Film) Printing is an innovative printing process that utilizes a UV printer to print directly to film that uses a UV printing technique, which enables the direct application of ink onto a transparent and thin film material. This printing method allows for vibrant colors and intricate designs to be transferred onto the desired surface.

**UV PRINTING**

UV LED printing is a full-colour, digital labelling process utilising UV-cured inks. Logos are directly printed on the product's surface in high-resolution, resulting in instant photo quality imprints.

**HEAT TRANSFER**

Digital transfer printing is a modern, full-colour alternative to traditional transfer printing. The design is printed in photo quality onto transfer paper with a special digital printer, then applied to the product with a heat press. Our digital transfer technology carries no limitation in size or shape of imprints.

# Printing technologies

**EMBROIDERY**

Embroidery is used to label textile products, resulting in durable and high-quality imprints, by an automatic embroidery machine which applies thread through needle stitches. Pantone matching is not achievable, due to limited thread colours.

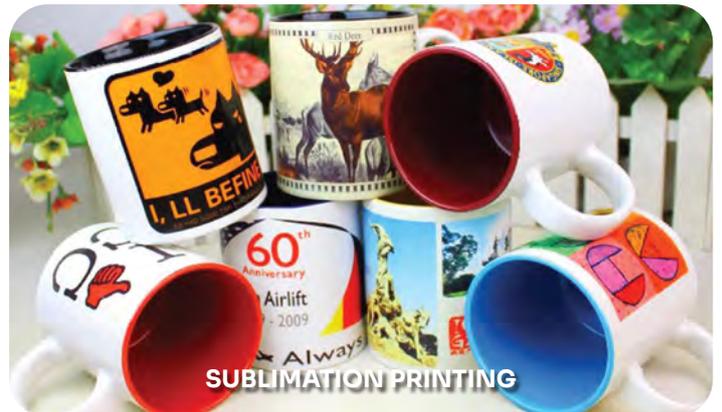

**DIGITAL PRINTING**

Digital printing is used to imprint paper products and paper inserts in photo quality. Paper inserts can be produced in various sizes and shapes.

**LASER ENGRAVING**

Engraving utilises lasers to mark a product's surface. The surface of the product practically burns in the process to develop the logo. Even small logos can be printed very accurately. Engraving is applicable to metal, wooden, glass and certain plastic products.

**SUBLIMATION PRINTING**

Sublimation printing is a full-colour, digital labelling technique with photo quality. Designs are printed with special ink on a transfer paper, then heat-pressed onto the product's surface. Sublimation is only applicable to light coloured polyester and sublimation coated products.

**EPOXY DOMING**

Epoxy doming is a unique printing technology, using full-colour printed stickers covered with 2 component resin. As a result, the treated sticker will have a 3-dimensional look. Epoxy domed logos can be produced in custom shapes and are resistant to UV rays.

**EMBOSSING/DEBOSSING**

Embossing and Debossing are the processes of creating either raised or recessed images. Embossing requires an etched metal die (female) and a matching counter die (male). The paper stock is pressed between the heated die and the counter and the image is pressed into the back of the stock to create a raised image.

# Why Choose NAM?

- **Comprehensive Service Provider:** Offering a wide range of business solutions under one umbrella, simplifying your operations.
- **Commitment to Quality and Customer Satisfaction:** Ensuring excellence in every project and prioritizing client needs.
- **Experienced Professionals:** A team of seasoned experts across all divisions, bringing deep industry knowledge.
- **Tailored Solutions:** Customizing services to meet the unique requirements of each business.
- **Proven Track Record:** Delivering consistent results and building trust since our establishment in 2018.

At NOOR Al Masafi (NAM), our mission is to be the preferred partner for businesses seeking comprehensive and customized solutions. Our diverse range of services, combined with our commitment to quality and customer satisfaction, positions us uniquely to support your business objectives. We look forward to collaborating with you and contributing to your organization's success.

*Solutions Beyond Expectations*
